Claude Code Skill Repositories

Collections of reusable skills, agents, and workflows to extend Claude Code capabilities.

TL;DR:

- **Skills.sh** — Curated marketplace, cross-tool (Cursor, Copilot, Gemini…), quick install
- **alirezarezvani** — Business/marketing heavy, Atlassian integration (1.8k stars)
- **wshobson** — Largest quantity (112 agents), token-optimized, infrastructure depth (28.8k stars)
- **everything-claude** — Continuous learning/instincts, MCP integrations, hackathon-proven (47.2k stars)
- **BMAD** — Most structured workflows, multi-agent orchestration, opinionated process (36.1k stars)
- **coreyhaines31** — Marketing-focused (26 skills), CRO/SEO/growth (8.1k stars)
- **obra/superpowers** — Full dev lifecycle framework (design☐ plan☐ execute☐ review), TDD-enforced (53.2k stars)

Skills.sh (Official Directory)

URL: https://skills.sh/ **Install:** `npx skills add <owner/repo>`

Curated marketplace for AI agent skills. Works across Claude Code, Cursor, Copilot, Cline, Gemini.

Categories:

- Frontend & Web (React, Tailwind, Vue, shadcn-ui)
- Backend & Infra (Next.js, Docker, K8s, APIs)
- Marketing & Content (SEO, copywriting, social)
- Testing & QA (E2E, accessibility, security audits)
- AI/ML (RAG, prompts, embeddings, LLM eval)
- Professional (code review, debugging, git workflows)

---

alirezarezvani/claude-skills

URL: https://github.com/alirezarezvani/claude-skills **Stars:** 1.8k **Skills:** 48 production-ready packages

Domain-focused skill bundles with docs, CLI tools, and templates.

Categories:

- C-Suite Advisory (CEO, CTO guidance)
- Marketing (content, demand gen, ASO, social)
- Product Team (PM toolkit, UX research, design systems)
- Project Management (Jira, Confluence, Scrum Master)
- Engineering, Finance, QA, Compliance

---

wshobson/agents

URL: https://github.com/wshobson/agents **Stars:** 28.8k **Scale:** 112 agents, 146 skills, 73 plugins across 24 categories

Large collection emphasizing minimal token usage through granular plugins.

Categories:

- Development (Python, JS/TS, full-stack, systems)
- Infrastructure (K8s, cloud, CI/CD, DevOps)
- Quality & Security (code review, audits, performance)
- AI/ML & Data (LLM apps, RAG, embeddings, ML ops)
- Specialized (blockchain, payments, SEO)

Model Strategy: Opus 4.5 for critical, Sonnet/Haiku for supporting tasks.

BMAD Method

URL: https://github.com/bmad-code-org/BMAD-METHOD **Stars:** 36.1k **License:** MIT (fully open source)

Structured framework rather than individual skills. Provides guided workflows with specialized agents working together.

Core Idea: AI as expert collaborators guiding structured processes, not replacements.

Features:

- 50+ adaptive workflows (scales from quick fixes to enterprise)
- Specialized agents (PM, architect, dev, UX, scrum master)
- Party Mode for multi-agent collaboration
- Full lifecycle coverage (requirements ⟶ design ⟶ stories ⟶ implementation)

Detailed Notes:

- [[BMAD-Creative-Intelligence-Suite]] - Creative/ideation agents (brainstorming, design thinking, storytelling)
- [[BMAD-Method-Management]] - Engineering pipeline agents (specs, architecture, dev, review)

---

affaan-m/everything-claude-code

URL: https://github.com/affaan-m/everything-claude-code **Stars:** 47.2k **Origin:** Anthropic hackathon winner

Comprehensive plugin collection with emphasis on continuous learning and verification loops.

Components:

- **Agents:** Planner, architect, code reviewer, security reviewer, TDD guide, E2E runner, language-specific reviewers (Go, Python, DB)
- **Skills:** Coding standards, backend/frontend patterns, TDD workflow, security review
- **Commands:** 30+ slash commands (`/plan`, `/tdd`, `/e2e`, `/code-review`, `/build-fix`, `/instinct-*`)
- **Rules:** Language-agnostic coding principles (TypeScript, Python, Go)

Unique Features:

- Continuous learning system with instinct-based pattern extraction
- Multi-plan orchestration (`/multi-plan`, `/multi-execute`)
- MCP configs for GitHub, Supabase, Vercel
- Interactive installation wizard

---

coreyhaines31/marketingskills

URL: https://github.com/coreyhaines31/marketingskills **Stars:** 8.1k **Skills:** 26 marketing skills across 7 categories **Install:** `npx skills add coreyhaines31/marketingskills` **License:** MIT

Marketing-focused skill collection for technical marketers and founders.

Categories:

- Conversion Optimization (page CRO, signup flow, onboarding)
- Content & Copy (copywriting, email sequences, social content)
- SEO & Discovery (SEO audit, programmatic SEO, schema markup)
- Paid & Distribution (paid ads, social content)
- Measurement & Testing (analytics tracking, A/B test setup)
- Growth Engineering (free tool strategy, referral programs)
- Strategy & Monetization (launch strategy, pricing strategy, marketing ideas)

Unique Features:

- Direct `/skill-name` invocation syntax
- Multiple install methods (CLI, plugin, submodule, SkillKit)
- Cross-tool support via SkillKit (Claude Code, Cursor, Copilot)

---

obra/superpowers

URL: https://github.com/obra/superpowers **Stars:** 53.2k **Skills:** 15+ composable skills **License:** MIT

Agentic skills framework providing a complete, structured software development lifecycle. Guides agents through design, planning, execution, and review phases so they can work autonomously for extended periods without deviating from approved plans.

Phases:

- Design (collaborative brainstorming, spec validation)
- Planning (granular, testable task breakdown)

- Execution (subagent-driven dev with two-stage review: spec compliance + code quality)
- Testing (enforced TDD with RED-GREEN-REFACTOR cycles)
- Review & Integration (code review, verification, branch management)

Skill Categories:

- Testing (TDD workflow, anti-patterns reference)
- Debugging (systematic root-cause analysis, evidence-based verification)
- Collaboration (planning, execution, reviews, parallel workflows)
- Meta (skill creation, framework intro)

Install: `/plugin marketplace add obra/superpowers-marketplace`, then `/plugin install superpowers@superpowers-marketplace`

Unique Features:

- Enforced test-driven development throughout
- Two-stage review process (spec compliance then code quality)
- YAGNI/DRY philosophy baked into workflows
- Cross-tool support (Claude Code, Codex, OpenCode)

Common Patterns Across Repos

All six GitHub repos share a core of similar capabilities:

Capability	alirezarezvani	wshobson	everything-claude	BMAD	coreyhaines3	superpowers
GitHub Stars	1.8k	28.8k	47.2k	36.1k	8.1k	53.2k
Architecture/Planning	Product Strategist	Full-stack Architect	Planner, Architect	Winston (Architect)	-	Design + Planning phases
Code Review	QA skills	Code Reviewers	Code/Security Review	`code-review` workflow	-	Two-stage review
Implementation	Engineering skills	Dev agents	TDD Guide	Amelia (Developer)	-	Subagent execution
Testing	-	-	TDD, E2E	-	A/B testing	Enforced TDD (RED-GREEN)
Project Management	Scrum Master, PM	-	-	Bob (Scrum Master), John (PM)	-	-
Marketing	Content, ASO	SEO	-	-	Full CRO/SEO/Growth	-
